

SHADY BEE LAWN SEED MIXTURE

PROTECT POLLINATORS AND CONSERVE NATURAL RESOURCES

Protects our at-risk pollinators

Exceptional Drought tolerance

Environmentally friendly

Low maintenance

Strong shade tolerance

The **Twin City Seed Sunny Bee Lawn Seed Mix** is an adaptation of our original bee lawn mix that is better-suited for a full-sun environment. Bee lawns are eco-friendly as they require less maintenance in the form of watering, mowing, and fertilizer than the typical lawn. This mix was developed by our in-house conservation specialist James Wolfin. Protect pollinators and improve your carbon footprint by planting a bee lawn!

Suggested maintenance: Bee lawns are low maintenance *after* they are established. Be sure to implement a light and frequent watering program after seeding. Once mature, we recommend maintaining bee lawns at a taller height than what is typical of a traditional lawn. Letting a bee lawn grow out to at least 6" will ensure that all flowers within the bee lawn mix are able to bloom.

BEE LAWN SEED MIX

- 23.25% Boreal Creeping Red Fescue
- 23.25% Intrigue Chewings Fescue
- 23.25% Gladiator Hard Fescue
- 23.25% Blue Mesa Sheep Fescue
- 3.0% White Dutch Clover
- 2.5% Self Heal
- 1.5% Blue-eyed grass
