

SUN & SHADE LAWN SEED MIXTURE

ALL PURPOSE LAWN SEED

Drought tolerant

Fast establishment

Low maintenance

Strong shade tolerance

Wide adaptability

Sun & Shade Lawn Seed Mix is designed to provide rapid germination and establishment, providing a quality turf requiring normal to low maintenance. It is best used where conditions provide medium amounts of sun and shade. It will provide a quality turf on a variety of soil conditions. The Kentucky Bluegrass used has some shade tolerance and provides excellent turf density and pest resistance when maintained as mentioned above. The Perennial Ryegrass can germinate and establish quickly and provide protection for the slower germinating grasses along with improved disease resistance. The Creeping Red and Chewings Fescue add shade tolerance to the turf stand and will perform in a low maintenance environment. All of the grasses used in this mixture blend nicely in both color and leaf texture.

Recommended Use: Sun & Shade Lawn Seed Mix is designed to perform best in areas that have 30% to 50% shade. It can be used successfully on a variety of soils existing in most sites, including home lawns, commercial properties, parks, schools, and other turf areas receiving normal to low maintenance.

SUN & SHADE LAWN SEED MIX

- 20% Mazama Kentucky Bluegrass
- 30% Silver Dollar Perennial Ryegrass
- 20% Intrigue Chewings Fescue
